

JOIN US AT EMBEDDED WORLD

Nuremberg, Germany
March 10-12, 2026
Hall 1, Stand 234 (1-234)

Visit us and explore Renesas' latest embedded semiconductor solutions to support & accelerate your design goals for industrial, automotive & consumer applications.

Meet our experts and discover:

- Next-generation high-performance **Arm Cortex-M85 based 32-bit MCUs** for AI, HMI, and motor control.
- Advanced **vision AI, HMI, and robotics** solutions based on our industry-leading offering of scalable, low-power, and high-performance **MCUs and MPUs**.
- AI-enabled motor control and zonal architecture solutions benefitting from our high-performance **Automotive MCUs** with proven safety.
- Unmatched precision in **sensing** solutions for magnet-free inductive position, predictive maintenance, and robust safety touch detection.
- **Wireless connectivity** solutions for smart homes, featuring Wi-Fi, Bluetooth, NFC, and audio.
- Solar microinverter using bi-directional **GaN** switches and smart digital control enabling MHz switching – for best-in-class efficiency and fast protection.
- First-of-its-kind **full product lifecycle development platform** – designed to bring together silicon and software on a collaborative cloud platform.
